Essential Technologies  
5435 Lexington Woods Lane  
Alpharetta, GA 30005

Dear Doug:

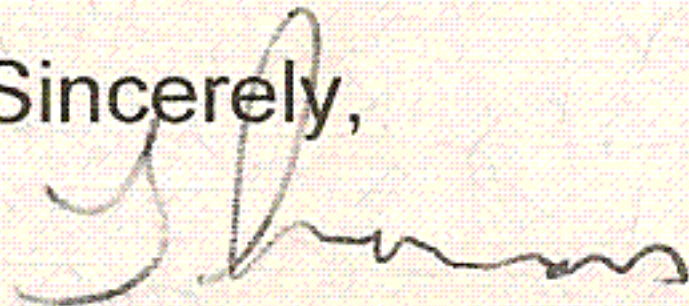

I wanted to take a moment to thank you for the outstanding job you do for us and for the peace of mind you give us.

Backing up your data is something that bugs you, and it is thought about. Unfortunately, all too often nothing is done about it. Your service allows us to worry about the work we are doing for our clients and not the work we will have to do should we lose our data.

We have been through data loss in the past and it was a nightmare. We spent weeks recreating data and some was never retrieved. What made it worse was we thought we had the data backed up by two separate methods and both methods failed. That is what is great about your service. We have peace of mind! When our internet connection was down just one time, you called the following morning to notify us and work through the issue. We will never have to wonder again. We know you will make sure we are protected.

Thanks again for the peace of mind and the outstanding job you do.

Sincerely,

Thomas A. Vizzini
